DESCRIPTORS *College Attendance; College Freshmen; *Enrollment Trends; Full Time Students; *Graduate Students; Higher Education; *Majors (Students); Part Time Students; Private Colleges; Professional Education; Public Education; Questionnaires; Racial Differences; Sex Differences; *Student Characteristics; Two Year Colleges; *Undergraduate Students

ABSTRACT

Data on 1980 college and university enrollments and trends observed for the preceding several years are presented. Information is provided on enrollment in institutions of higher education by control and level of institution, student sex, and attendance status of student, major field of study, and race/ethnicity. Specific data include: enrollment of first-time freshmen in institutions of higher education, by control and level of institution; undergraduate, graduate, and first-professional enrollments by race/ethnicity; enrollments for the aggregate United States; level of enrollment, attendance status, and student sex for the 100 institutions with the largest enrollment in 1980; public and private college enrollments; and full-time equivalent and part-time enrollments. Highlights are as follows: 1980 enrollments increased by 4.5 percent over the fall 1979 level; enrollment increases occurred for all types of institutions, with two-year institutions showing more growth than universities and other four-year schools; and the number of women enrolling in higher education institutions rose 5.7 percent compared with a 3.3 percent increase for men; part-time enrollment rose 4.7 percent, and students enrolled part time maintained a 41-percent share of the population at all institutions; the number of men enrolled in graduate programs rose 0.8 percent in 1980; enrollment of first-time freshmen increased 3.4 percent at all institutions between 1979 and 1980, but public and private universities reported declines in the number of first-time freshmen. In addition to statistical tables and graphs, narrative sections are included, along with a questionnaire and information on the research methodology. (SW)

National Center for Education Statistics

"The purpose of the Center shall be to collect and disseminate statistics and other data related to education in the United States and in other nations. The Center shall . . . collect, collate, and, from time to time, report full and complete statistics on the conditions of education in the United States; conduct and publish reports on specialized analyses of the meaning and significance of such statistics; . . . and review and report on education activities in foreign countries."--Section 406(b) of the General Education Provisions Act, as amended (20 U.S.C. 1221e-1).

Foreword

In order to minimize the burden on reporting institutions, the National Center for Education Statistics (NCES) and the Office for Civil Rights (OCR) Department of Education conduct a single fall enrollment survey every other year that satisfies the data requirements of both offices. The agreement provides for the collection of race/ethnic and field of study data on alternate years of the annual fall enrollment survey. NCES serves as the data collection agency for the information which forms the basis of the reports. This year's report includes race/ethnic and field of study enrollment data as well as other enrollment data collected in 1980.

There are a number of tables that had routinely been included in the past that are excluded from this report. Institutional data gathered on the 1980 Fall Enrollment and Compliance Report are not being published as part of this report. Also, this is the last edition of *Fall Enrollment* that contains data by Aggregate United States (which is the 50 States, the District of Columbia, and outlying areas.) Table A-12 shows summary information by level of enrollment, attendance status, and sex of student for the 100 institutions with the largest enrollment in 1980. Tables that are not included in this report, but which were published in previous editions,may be obtained from NCES's Statistical Information Office.

Appendix Tables

A Trends in fall enrollment by sex, institutional control, and enrollment category: Aggregate United States, fall 1970 through fall 1980 28

B-1. Fall enrollment in higher education, by level of institution and sex and attendance status of student and first-time freshmen, and full-time equivalent (FTE) of part-time enrollments: All institutions, fall 1979 and fall 1980 29

B-2. Fall enrollment in higher education, by control and level of institution and sex and attendance status of student and first-time freshmen : All public and private institutions, fall 1979 and fall 1980 29

B-3. Fall enrollment in higher education, by level of institution and sex and attendance status of student and first-time freshmen, and full-time equivalent (FTE) of part-time enrollments: All public institutions, fall 1979 and fall 1980 30

B-4. Fall enrollment in higher education, by level of institution and sex and attendance status of student and first-time freshmen, and full-time equivalent (FTE) of part-time enrollments: All private institutions, fall 1979 and fall 1980 30

B-5. Fall enrollment in higher education, by level of institution and sex and attendance status of student and first-time freshmen: All institutions, fall 1979 and fall 1980 31

B-6. Total enrollment in institutions of higher education, by level of enrollment, sex, and attendance status of student and by control and level of institution: Aggregate United States, fall 1980 32

B-7. Total enrollment in institutions of higher education, by public and private control: All institutions, aggregate United States, fall 1980 34

B-8. Total enrollment in institutions of higher education, by sex and attendance status of student, and full-time equivalent (FTE) of part-time enrollment, and number of first-time students and by State or other area: All institutions, aggregate United States, fall 1980 35

B-9. Total enrollment in institutions of higher education, by ethnicity, sex and attendance status of student and by control and level of institution: Aggregate United States, fall 1980 36

B-10. Total enrollment in institutions of higher education, by major degree field and sex and by control and level of institution: Aggregate United States, fall 1980 36

B-11. Total enrollment in institutions of higher education, by level of enrollment, sex and attendance status of student and by major degree field and ethnicity: Aggregate United States, fall 1980 38

B-12. Top 100 institutions of higher education, by enrollment: Fall 1980 42

Highlights

*The number of students enrolled in the Nation's colleges and universities increased for the third consecutive year according to the results of the fall 1980 enrollment survey conducted by the National Center for Education Statistics (NCES). The survey on which this report is based is part of the annual Higher Education General Information Survey (HEGIS) program. Enrollment in all institutions of higher education rose 4.5 percent over the previous year to a total of 12,234,644 for the fall of 1980.[1]

*Enrollment increases were reported for all types of institutions with 2-year institutions showing more growth than universities and other 4-year schools. Public colleges and universities realized an overall increase of 4.6 percent in 1980, slightly higher than that in private institutions. The bulk of the growth took place in public 2-year institutions, up 6.7 percent over 1979 totals, while public universities and other 4-year institutions reported increases of 2.6 percent and 3.2 percent, respectively. In the private sector, however, the largest absolute growth took place among institutions classified in the "other 4-year" category.

*The trend toward increasing enrollment of women in all institutions of higher education continued in fall 1980; the number of women rose 5.7 percent compared with a 3.3-percent growth rate among their male counterparts. Although women have continued to enroll in increasing numbers since the mid-seventies, this is only the second year of enrollment growth among men, following declines between 1975 and 1978.

*Students enrolled on a part-time basis maintained a 41-percent share of the population at all institutions. Overall, part-time enrollment rose 4.7 percent, with the majority of the increase reported by public institutions.

*The number of men enrolled in graduate programs increased 0.8 percent in 1980, following a 2.5-percent decline in 1979.

*The enrollment of first-time freshmen increased 3.4 percent at all institutions between 1979 and 1980, somewhat less than the 4.8-percent growth rate reported the previous year. Public and private universities, however, reported declines in the number of first-time freshmen, down 1.7 percent and 6.7 percent, respectively.

[1]Information contained in this report pertain to the Aggregate United States: 50 States, the District of Columbia, and the outlying areas.

Enrollment Change by Control and Level of Institution

During the fall of 1980, institutions in all control/level categories reported increases in the number of students enrolled. Most of the growth occurred in public institutions, up 422,000 to a total of 9.5 million in 1980, while private institutions recorded an additional 106,000 students enrolled. Most of the overall increase took place in 2-year institutions which showed an enrollment gain of over 306,000, a 7.2-percent rise over the previous year. Some of this growth is attributable to an increase in the size of the HEGIS universe, which for the past few years had remained fairly stable.[2] Overall, 2-year institutions reported the largest rates of increase, 6.7 percent at public and 18.4 percent at private 2-year schools. The second largest growth rate occurred among other 4-year institutions, 3.2 percent for public and 3.8 percent for private institutions. Universities also reported modest gains in both sectors (table 1 and figure 1).

Over the past three years, enrollment patterns have varied somewhat among the different types of institutions (table 1). While the growth rate at universities remained relatively constant at a modest 2 percent per year, other 4-year schools doubled their rate of growth between 1978-79 and 1979-80. The enrollment growth rate at 2-year institutions also increased during this same period, far outpacing that at all other types of institutions (table 1 and figure 2).

The private sector as a whole maintained a 22.2-percent share of all students enrolled in institutions of higher education in fall 1980, virtually the same as in prior years.

By fall 1980, universities enrolled 23.9 percent of all college students and other 4-year institutions enrolled a 38.8-percent share. Two-year institutions accounted for an increasing share in 1980, 37.2 percent compared with 35.7 percent in 1978.

Table 1. Enrollment in institutions of higher education, by control and level of institution: Fall 1978-80

Control and level of institution	1978	1979	1980	Percent change	
				1978-79	1979-80

SOURCE: U.S. Department of Education, National Center for Education Statistics, *Fall Enrollment in Higher Education.*

[2]Some increases in enrollment are accounted for by changes in the universe of institutions surveyed from year to year. There were 97 private schools (the majority are National Association of Trade and Technical Schools (NATT schools)) and 9 public institutions that were newly eligible to be included in the universe for fall 1980. For example: The enrollment for private 2-year institutions increased 18.4 percent from 1979 to 1980. This large percent increase reflects the 67 private 2-year institutions (primarily NATT schools) which were included for the first time in the universe for fall 1980. However, without the inclusion of the 67 newly eligible schools, which enrolled a total of 33,733 students, private 2-year institutions would show a decline of 0.3 percent from 1979 to 1980.(See appendix C for the effect of the universe change on all types of institutions).

Figure 1.—Percent change in enrollment, by control and level of institution: Fall 1978 to fall 1979 through fall 1979 to fall 1980

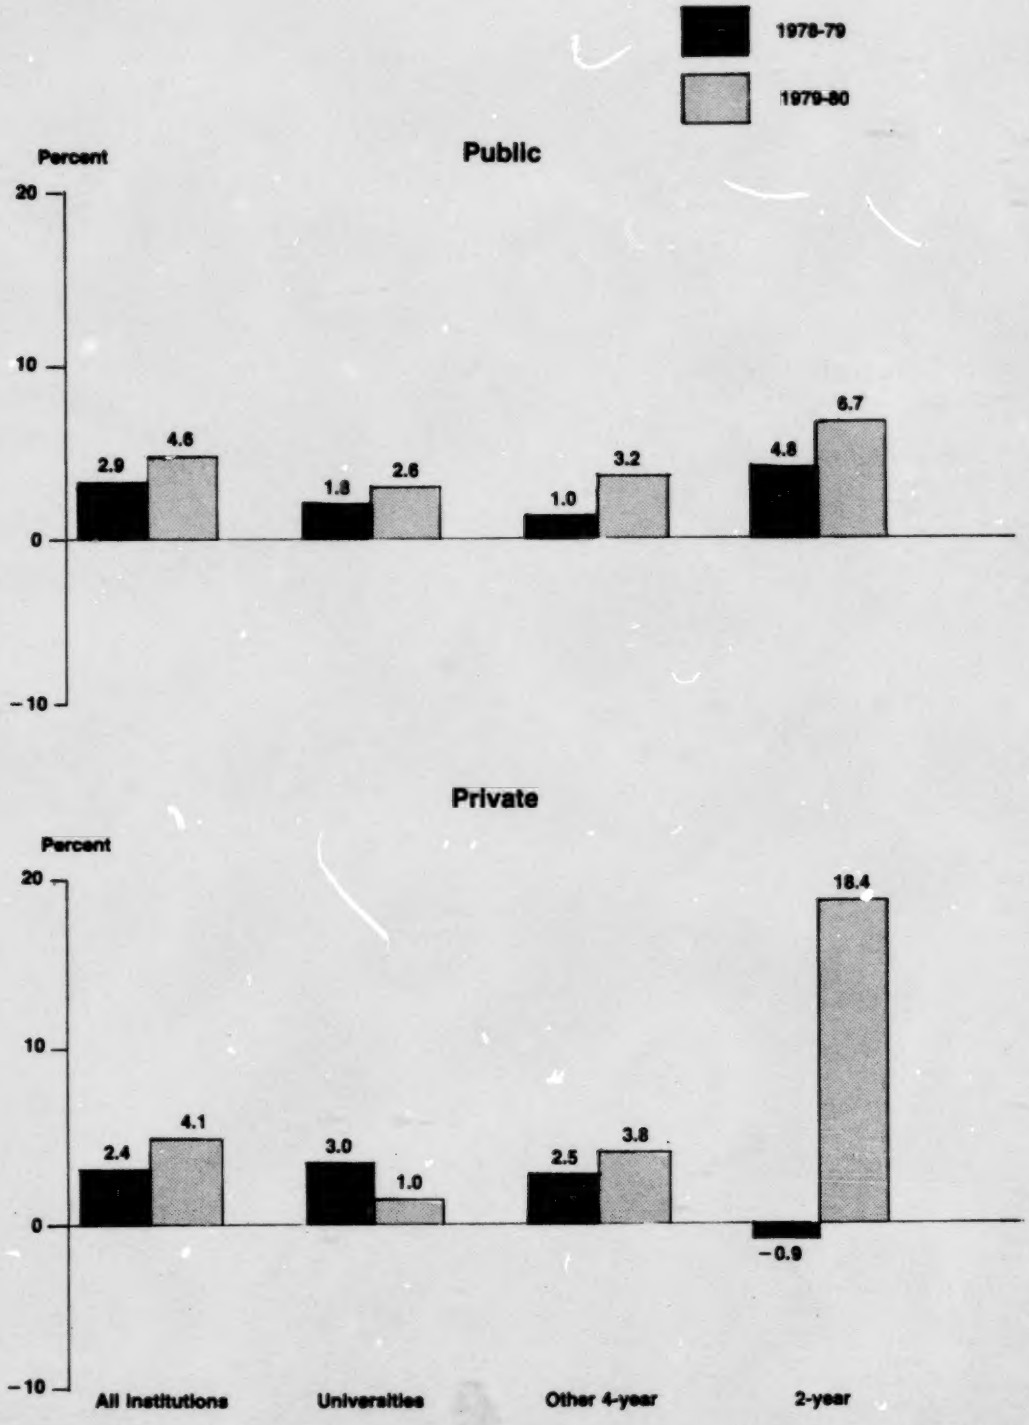

Figure 2.—Percent change in enrollment, by level of institution: Fall 1978 to fall 1979 through fall 1979 to fall 1980

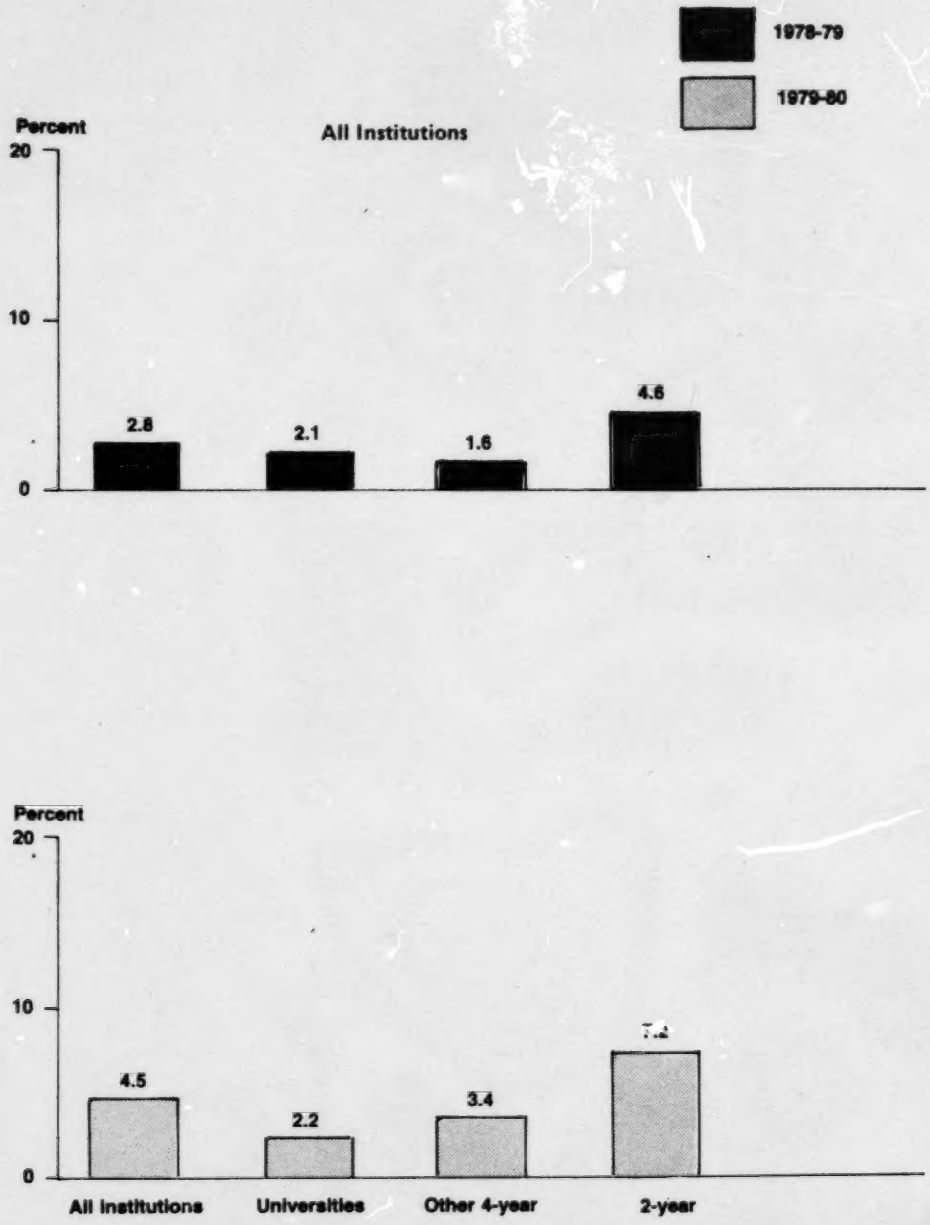

Enrollment Change by Sex of Student

Between 1979 and 1980, enrollment was up 5.7 percent among women and 3.3 percent among men. By fall 1980, women accounted for 51.5 percent of all students enrolled in institutions of higher education, up from 47.3 percent in 1976. Nearly 40 percent of all women attending college were enrolled in 2-year institutions, another 39 percent in those classified as other 4-year, and the remaining 21 percent in universities (table 2 and figure 3).

Although more women enrolled in public institutions in 1980 than in private institutions, the rates of growth in each sector were relatively the same (table 3 and figure 4). The largest increases were reported by 2-year institutions (7.7 percent in public and 12.4 percent in private schools), closely followed by the other 4-year schools. While the number of women enrolled full and part time rose 4.8 percent and 6.7 percent, respectively, women enrolled full time still constitute a much larger portion of the total enrollment than part-time women students.

The number of men attending institutions of higher education rose for the second year in a row, with a 3.3-percent increase for fall 1980. The most notable rate of increase among men occurred in private 2-year institutions (up 27.8 percent),[3] while public 2-year schools reported the largest absolute growth, an increase of 5.6 percent over 1979 totals. The number of men enrolled full and part time rose 4.0 percent and 2.1 percent, respectively, during the period 1979-80. The four percent increase in the full-time count followed a marginal increase in 1979 and declines in the two previous years.

Table 2. Enrollment in institutions of higher education, by sex: Fall 1980

Level of institution	Women		Men	
	Number	Percent	Number	Percent

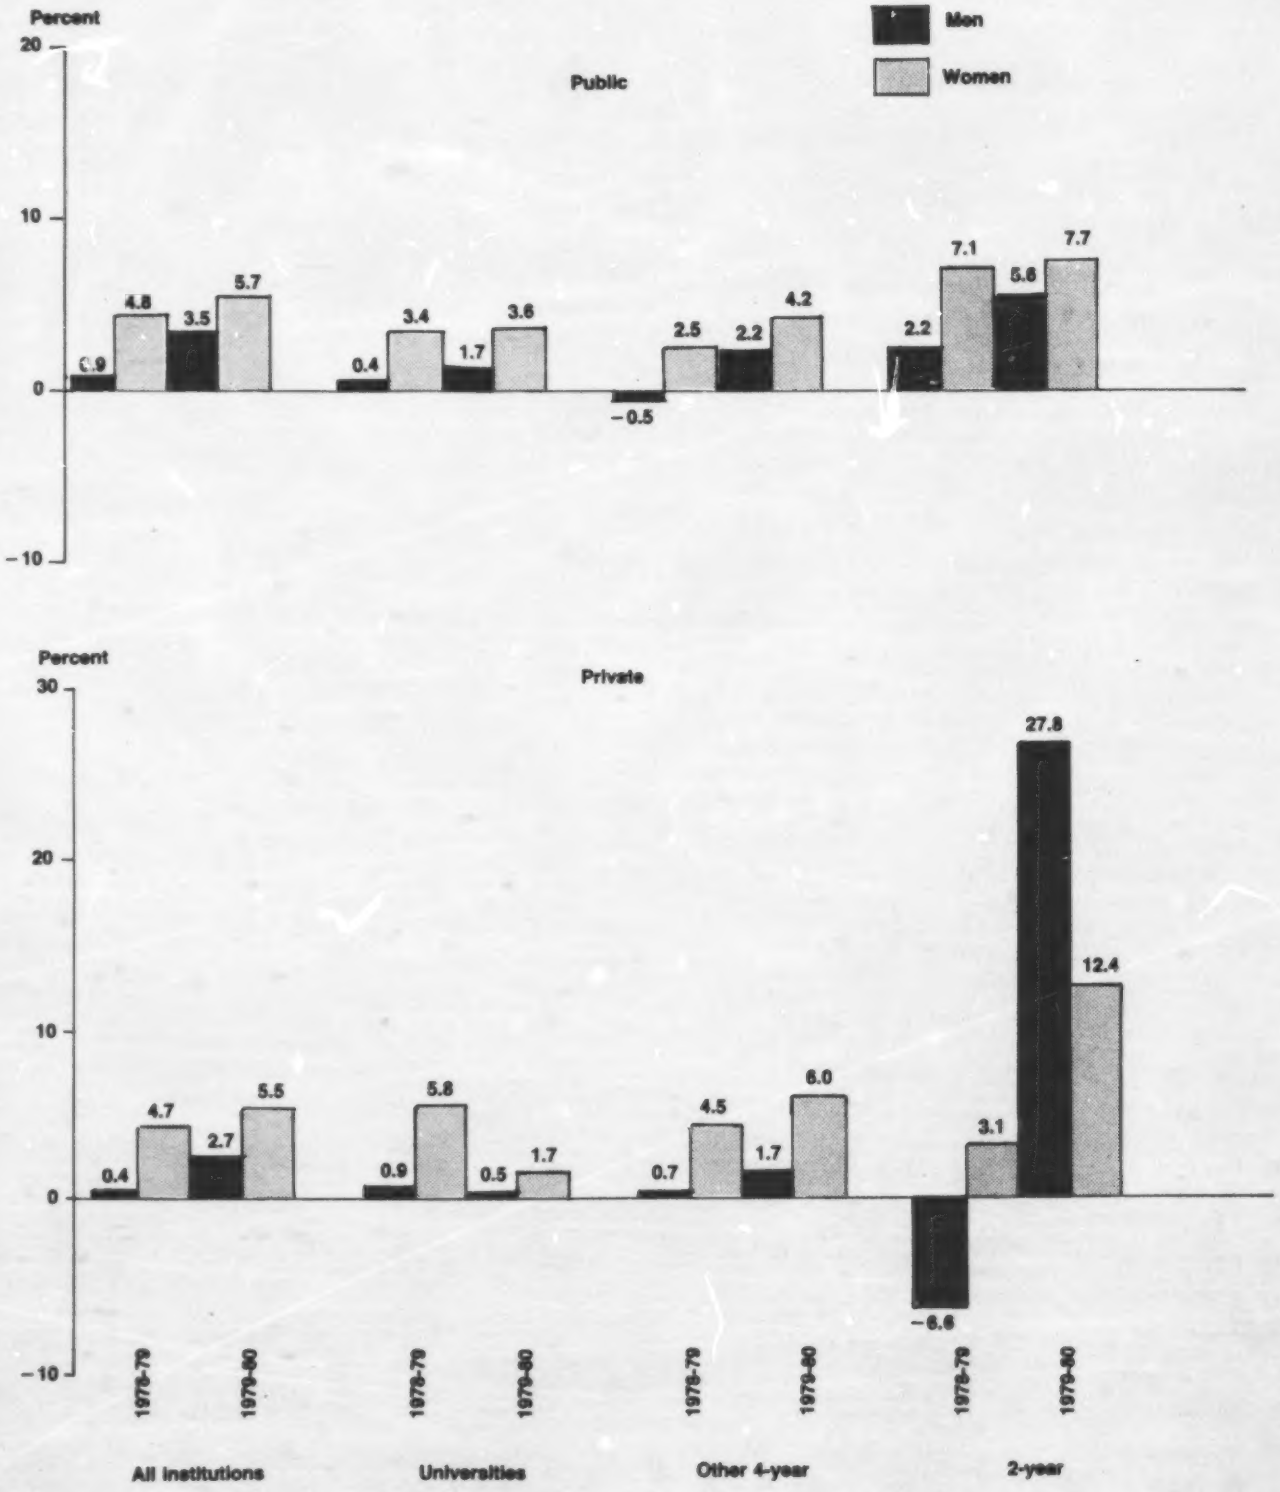
Figure 4.—Percent change in enrollment, by control and level of institution and sex of student: Fall 1978-80



Enrollment Change by Attendance Status of Student

Part-time enrollment in institutions of higher education increased at a slightly faster rate than full-time enrollment for fall 1980—4.7 percent compared with 4.4 percent. Increases were spread among the various types of institutions, with only private universities realizing a decline of 0.6 percent. Two-year institutions in particular reported sizeable increases (147,000) in the number of students attending part time in 1980 primarily in the public sector (table 4 and figure 5).

Women outnumbered men in part-time programs for the fifth consecutive year, as their numbers increased 6.7 percent to a record 2.8 million, compared with 2.2 million men enrolled part time. Conversely men were more prominent in full-time programs reaching 3.7 million or 52 percent of the total 7.2 million full-time students in 1980.

While more than half of all part timers attended 2-year institutions, full-time enrollment was spread more among the various types of schools: the majority, 45 percent, attended other 4-year schools, while universities and 2-year institutions accounted for 31 percent and 24 percent of the total, respectively.

Table 4.—Enrollment in institutions of higher education, by control and level of institution and attendance status of student: Fall 1978-80

Control and level of institution and attendance status	1978	1979	1980	Percent change	
				1978-79	1979-80

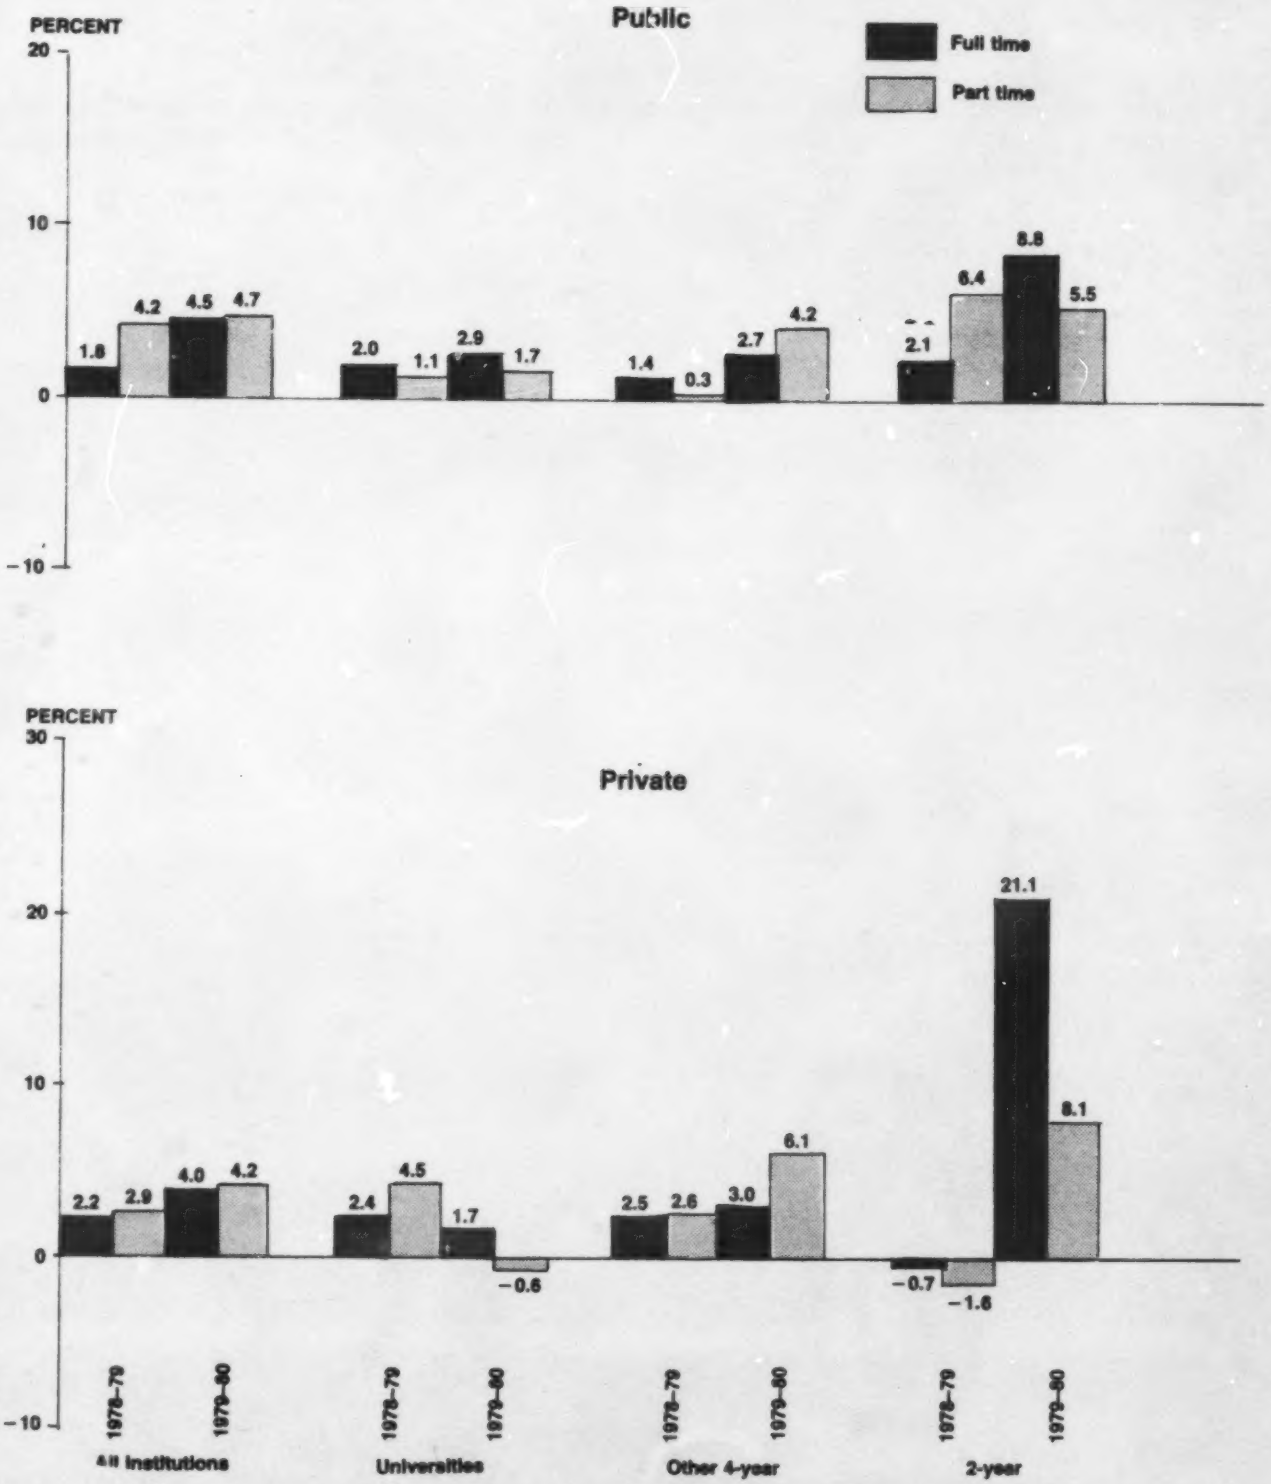
Figure 5.—Percent change in enrollment, by control and level of institution and attendance status of student: Fall 1978-80



Enrollment Change by Level of Student

Increases in enrollment in higher education were found at all levels in 1980—undergraduate, graduate, first-professional, and unclassified. The most important rate of growth was the 5.6-percent increase among first-professional students which represents the Nation's medical, dental, veterinary, law, and other professional school populations. Graduate enrollment increased 2.9 percent in 1980, following a 1-percent decline in 1979. The undergraduate category realized the largest absolute increase, up nearly half a million students from 1979 (5 percent, compared with a 2.8-percent rise during the 1978-79 period) (table 5 and figure 6).

The number of men enrolled at all levels of higher education increased in fall 1980, except at the unclassified level, which experienced a slight drop in male enrollment, down 0.7 percent for 1980. Enrollment for men at the undergraduate level showed the largest increase, up 4.2 percent. The number of men enrolled in both graduate and first-professional programs in 1980 also increased over the prior year; the most noticeable change, however, was the reversal of the downward trend in the number of men enrolled in graduate programs that began in 1976.

The gains for women are more impressive. Over 260,000 more women enrolled at the undergraduate level in 1980 than in 1979, while at the graduate level, women showed an appreciable gain of 5.1 percent in 1980 compared with a growth rate of 1.2 percent in 1979. Women realized the greatest rate of increase at the first-professional level, up 12.1 percent in 1980. Although women comprised only 28.3 percent of all first-professional students in 1980, their proportion rose from 26.7 percent the previous year and 22.3 percent in 1976.

Table 5.—Enrollment in institutions of higher education, by level: Fall 1977-80

Enrollment category	1977	1978	1979	1980	Percent change		
					1977-1978	1978-1979	1979-1980
Total	**11,415,020**	**11,391,950[1]**	**11,707,126**	**12,234,644**	**−0.2**	**2.8**	**4.5**
Undergraduate	8,769,361	8,704,576	8,946,348	9,392,825	−0.7	2.8	5.0
Graduate	1,090,463	1,085,375	1,074,922	1,105,570	−0.5	−1.0	2.9
First-professional	252,899	258,496	264,993	279,797	2.2	2.5	5.6
Unclassified	1,302,297	1,343,500	1,420,863	1,456,452	3.2	5.8	2.5

[1]The totals for undergraduate, graduate, first-professional, and unclassified do not add to the grand total for all students. There is a difference of 3 students because a number of institutions were unable to divide their enrollments by the categories listed.

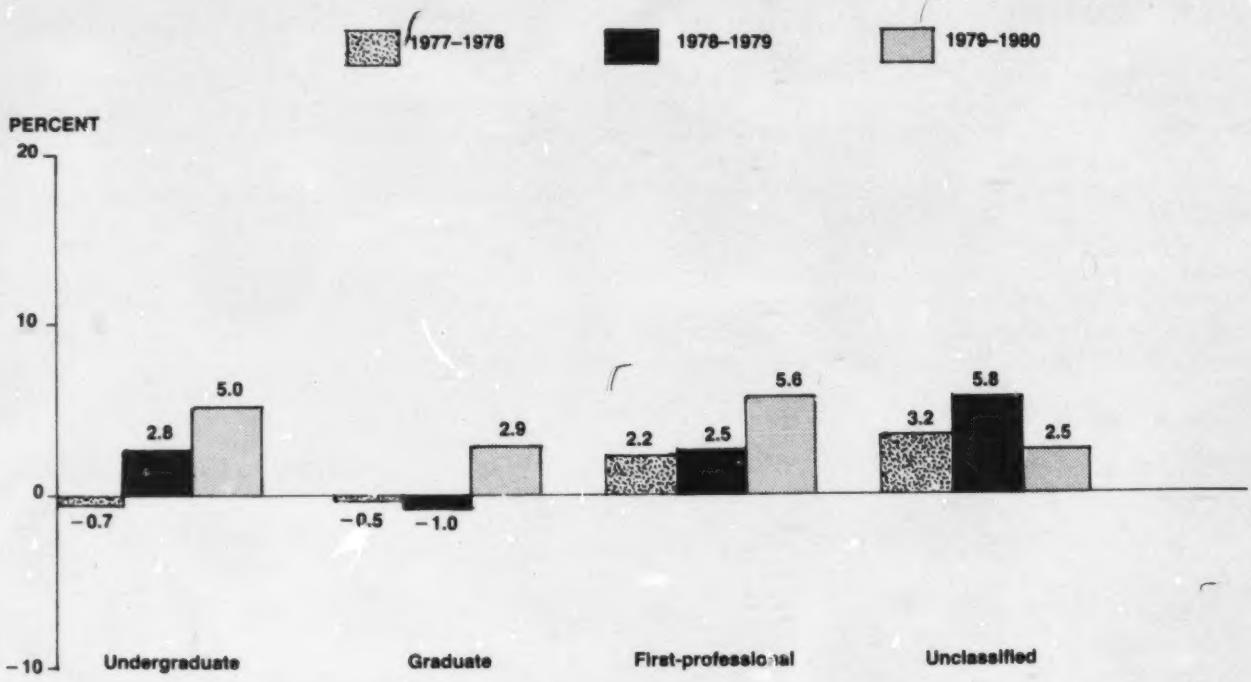
Figure 6.—Percent change in enrollment, by level: Fall 1977–80



Changes in Enrollment of First-Time Freshmen

The number of first-time freshmen entering undergraduate programs at all institutions of higher education in the fall of 1980 increased 3.4 percent over 1979. Even though first-time freshmen experienced an increase, the rate of growth was lower than the 4.8-percent increase reported between 1978 and 1979. Universities in both the public and private sectors reported declines in the number of first-time freshmen enrolled, 1.7 percent and 6.7 percent, respectively. Because enrollment of first-time freshmen at universities had increased steadily in both 1978 and 1979, the decline between 1979 and 1980 may be an indication of a reversal in enrollment patterns.

The largest rate of change among first-time freshmen was the 19.8-percent increase in private 2-year institutions, which followed a 0.5-percent decline in 1979[4]. Although public 2-year schools reported the largest absolute increase in enrollment, the actual rate of growth dropped from 7.0 percent in 1979 to 4.7 percent in 1980. Among public other 4-year institutions, the rate of growth remained constant, while for private other 4-year colleges, the rate increased from 2.3 percent in 1979 to 3.8 percent in fall 1980 (table 6 and figure 7).

Table 6.—Enrollment of first-time freshmen in institutions of higher education, by control and level of institution: Fall 1978-80

Enrollment category	1978	1979	1980	Percent change

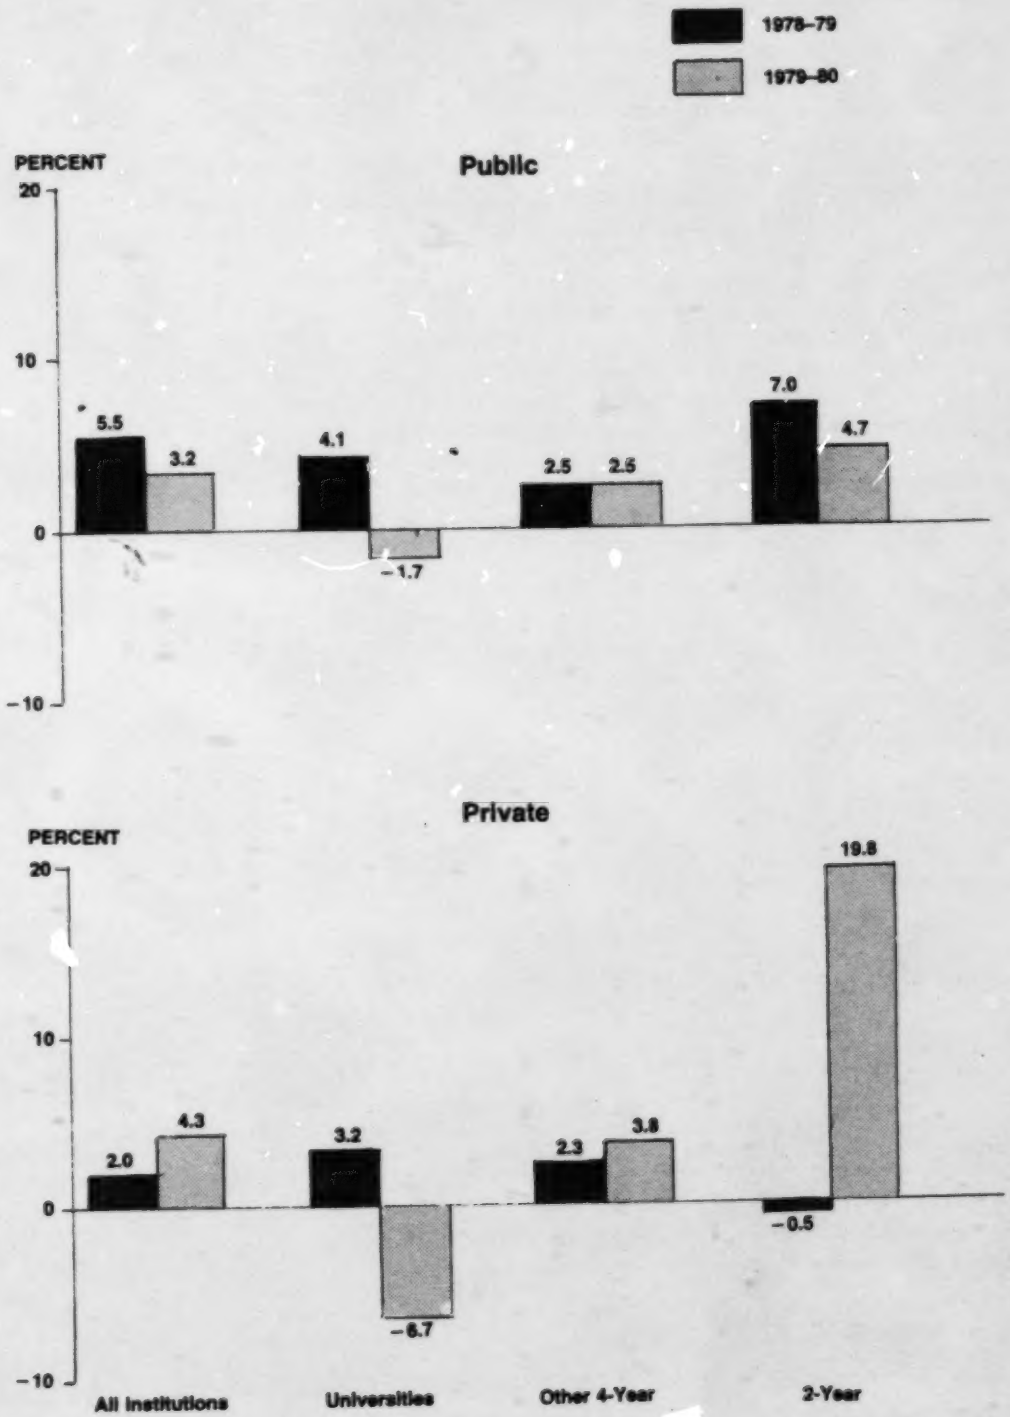
Figure 7.—Percent change in enrollment of first-time freshmen, by control and level of institution: Fall 1978-80



Changes in Enrollment in Ten Selected Fields of Study

In the years 1976, 1978, and 1980 the Fall Enrollment and Compliance Report has collected data on ten selected fields of study. These ten selected fields (Agriculture and natural resources; architecture and environmental design; biological sciences; business and management; engineering; dentistry; medicine; veterinary medicine; law; and physical sciences) were defined by the Office of Civil Rights as the most important for monitoring racial/ethnic composition. For fall 1980, 74 percent of all students enrolled in institutions of higher education, were reported as majoring in fields of study other than these ten, or were undecided as to their major.

Among the ten selected fields, the three largest in terms of enrollment in 1980 were business and management, engineering, and biological sciences. Fourteen percent of all students were enrolled in the field of business, engineering enrolled another 5 percent, and biological sciences, 2 percent.

Enrollment in the fields of dentistry, medicine, and veterinary medicine, accounted for 1 percent of all individuals attending the Nation's colleges and universities.

In 1980, men outnumbered women in each of the ten selected fields. However, in most fields, the number of women enrolled are increasing at a faster rate than men (table 7).

In business and management, the number of women increased 28.5 percent during the 2-year period 1978-1930, while the growth rate for men increased only 1.9 percent. In engineering, women also showed considerable gains—up 40.4 percent between 1978 and 1980. Women enrolled in the biological sciences also continued to increase, but at the lowest rate, only 0.2 percent. Only three of the selected fields, agriculture and natural resources, biological sciences, and law realized declines in the total number of students enrolled as of fall 1980.

Table 7.—Enrollment in institutions of higher education, by major field of study: Fall 1978-80

Major field of study	1978			1980			Percent change 1978-80 [1]	
	Total	Men	Women	Total	Men	Women	Men	Women

[1]Data collected in even years only, change is for 2-year period.

[2]Students majoring in fields other than the ten selected, or those undecided in major.

SOURCE: U.S. Department of Education, National Center for Education Statistics, *Fall Enrollment in Higher Education.*

Changes in Enrollment by Race/Ethnicity and Citizenship Status

Data on enrollment by race/ethnicity and citizenship status are also collected in even years;[5] the categories are: non-resident aliens (these students are not classified by race); black, non-Hispanic; American Indian/Alaskan Native; Asian or Pacific Islander; Hispanic; and white, non-Hispanic. Four-fifths of all college students in 1980 were white, non-Hispanics. Of the five other categories, black, non-Hispanics were the largest group, comprising 9.1 percent of the total. Hispanics accounted for 4.9 percent, while Asian or Pacific Islanders and American Indian/Alaskan Natives had the smallest representation, 2.4 percent and 0.7 percent, respectively (table 8 and figure 8).

While white, non-Hispanics represented the largest enrollment group and the largest absolute growth, they ranked fifth in terms of their percent increase from fall 1978 to 1980 (6.9 percent). Black, non-Hispanics represented the second largest enrollment group but ranked last among the six major race/ethnic categories, with the smallest percent change, 5.0 percent from 1978 to 1980. Asians or Pacific Islanders constituted only 2.4 percent of all students enrolled, and partly because of the relative size of the group, showed the largest growth, up 21.5 percent during the same period. Non-resident aliens increased at the second highest rate, 20.8 percent, and by 1980, they constituted 2.5 percent of the total student population. The number of Hispanics increased during this period, 11.3 percent, as did American Indian/Alaskan Natives with a percent increase of 7.8 (table 9 and figure 9).

Among undergraduates, non-resident aliens and Asian or Pacific Islanders showed similar patterns as discussed above, up 22.7 percent and 20.1 percent, respectively, between 1978 and 1980 (table 10). American Indian/Alaskan Native and white, non-Hispanics, showed virtually no changes in enrollment at the undergraduate level from 1976 to 1978, but in 1980, these categories reported dramatic increases (figure 10).

Table 8.—Enrollment in institutions of higher education, by race/ethnicity: Fall 1980

Race/ethnicity category	Total	Percent of total
Total	**12,224,557**	**100.0**
Non-resident alien	305,748	2.5
Black, non-Hispanic	1,108,348	9.1
American Indian/Alaskan Native	83,923	0.7
Asian or Pacific Islander	289,663	2.4
Hispanic	602,178	4.9
White, non-Hispanic	9,834,697	80.4

SOURCE: U.S. Department of Education, National Center for Education Statistics, *Fall Enrollment in Higher Education.*

[5]The Office for Civil Rights does not require all institutions to report racial/ethnic information. Total enrollment at all institutions was 12,234,644; total enrollment at institutions reporting racial/ethnic data was 12,224,557.

Figure 8.—Enrollment in institutions of higher education, by race/ethnicity: Fall 1980

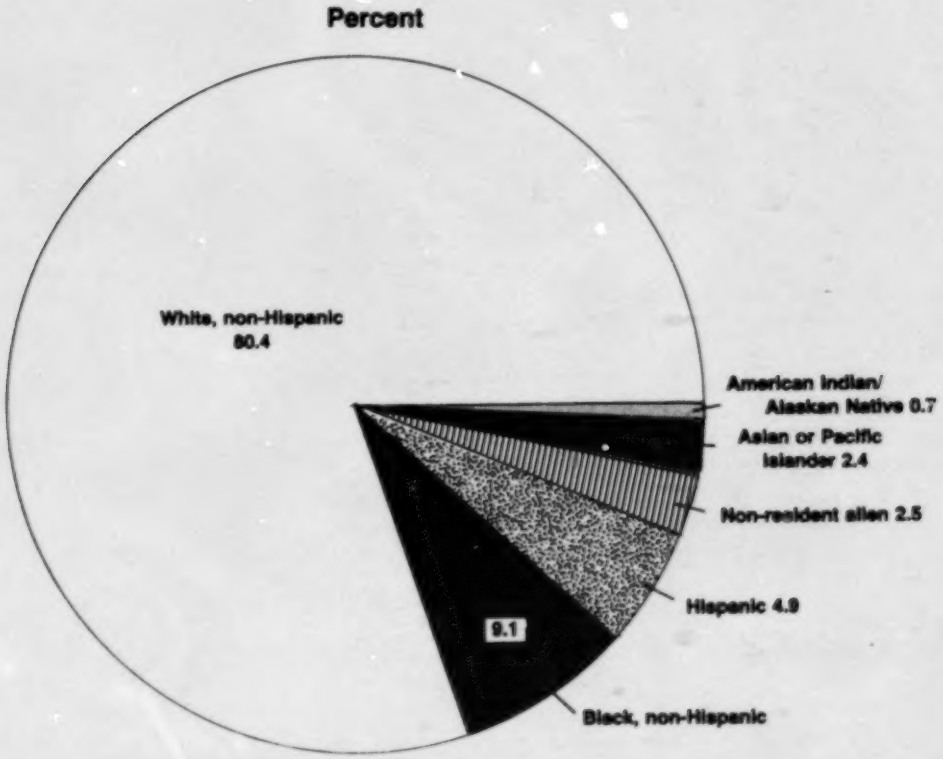

Table 9.—Enrollment in institutions of higher education, by race/ethnicity: Fall 1978-80

Race/ethnicity category	Enrollment		Percent change 1978-1980[1]
	1973	1980	
Total[2]	**11,363,031**	**12,224,557**	**7.6**
Non-resident alien	253,025	305,748	20.8
Black, non-Hispanic	1,055,964	1,108,348	5.0
American Indian/Alaskan Native	77,885	83,923	7.8
Asian or Pacific Islander	238,484	289,663	21.5
Hispanic	541,270	602,178	11.3
White, non-Hispanic	9,196,403	9,834,697	6.9

[1]A portion of the increase in enrollment can be attributed to schools newly eligible for inclusion in the HEGIS surveys between 1978 and 1980. These schools had virtually no effect on changes in enrollment patterns for most groups. The American Indian/Alaskan Natives group was affected, however; 2.2 percent of the 10.2 perc[illegible]ncrease was due to the addition of newly eligible schools.

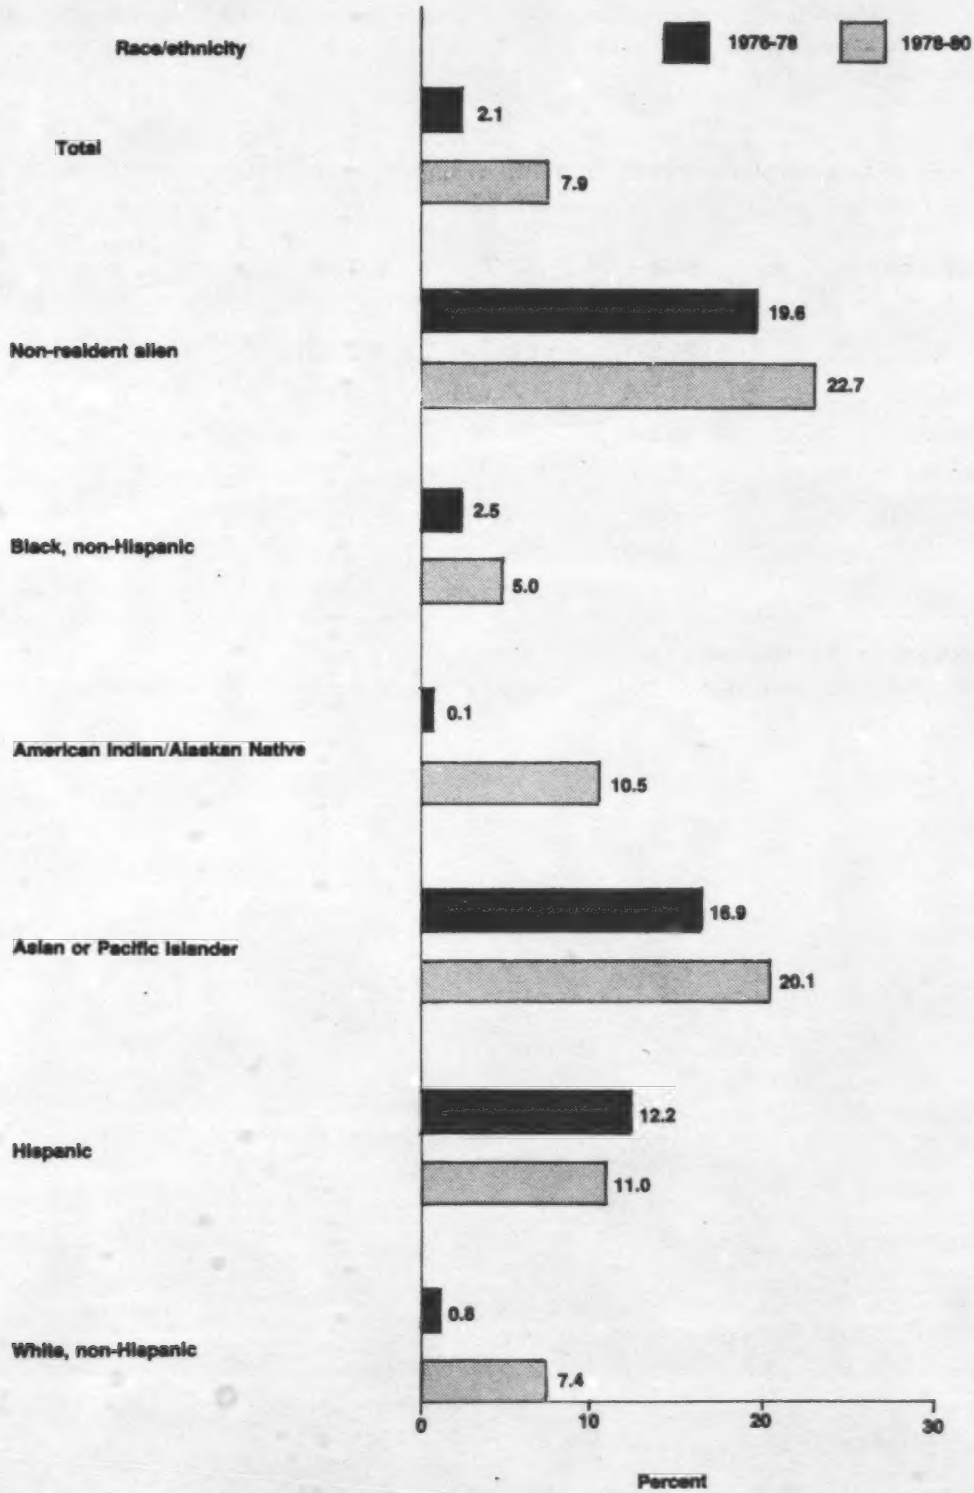
Figure 10.—Percent change in enrollment of undergraduate students, by race/ethnicity: Fall 1976–80



At the graduate level, all groups, except black, non-Hispanics, had larger rates of growth in 1980 than did white, non-Hispanic students. White, non-Hispanics increased only 0.8 percent in 1980 after a decline in enrollment between 1976 and 1978. Black students continued to show declines in enrollment at the graduate level—down 2.9 percent for 1980 following a 5.3-percent drop in the previous period (figure 11). Non-resident aliens and Hispanics realized the largest percent increase in 1980 (17.0 percent and 16.6 percent, respectively) among all students at the graduate level (table 11).

Table 11.—Graduate enrollment in institutions of higher education, by race/ethnicity: Fall 1976-80

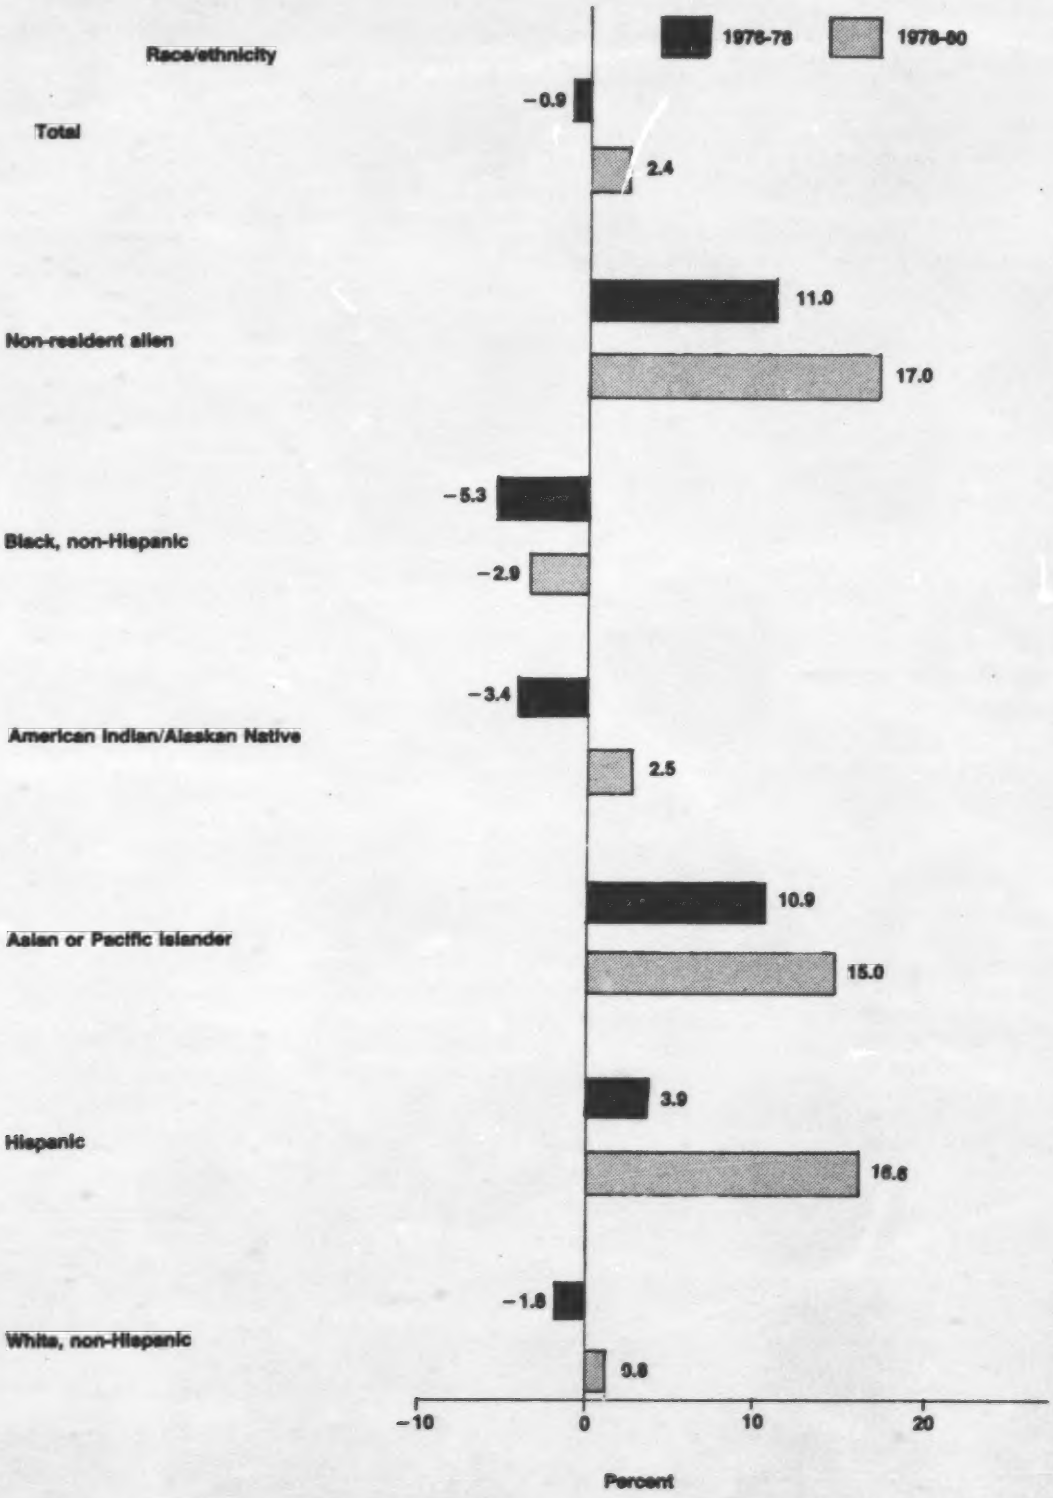
Figure 11.—Percent change in enrollment of graduate students, by race/ethnicity: Fall 1976-80



29

At the first-professional level, Asian or Pacific Islanders ranked first with the largest percent increase of 27.6 percent for 1980; Hispanics ranked second with a 23.1-percent rise, and black, non-Hispanics, followed with a 12.3-percent increase (table 12). Non-resident aliens and American Indian/Alaskan Natives registered the only decline in enrollment at the first-professional level, down 4.7 and 24.9 percent, respectively, for 1980. White, non-Hispanics, the largest first-professional enrollment group, increased 8.0 percent in 1980 (figure 12).

Table 12.—First-professional enrollment in institutions of higher education, by race/ethnicity: Fall 1976-80

Race/ethnicity	1976	1978	1980	Percent change	
				1976-78	1978-80

Appendixes

Appendix A - Methodology

Survey Background

This report presents the results of the 1980 Fall Enrollment and Compliance Report which was conducted as part of the fifteenth annual Higher Education General Information Survey (HEGIS) program. All institutions recognized as accredited and listed in the *Education Directory, Colleges and Universities: 1980-81* provided information for this survey.

Institutions of higher education and the individual branches of multi-campus institutions included in this report are classified as either 2-year or 4-year, with universities as a separate subclassification of the latter. The 4-year institutions are those that offer programs extending at least 4 years beyond high school. They comprise all institutions that grant bachelor's or higher degrees or some equivalent recognition; e.g., ecclesiastical recognition in theological institutions. Some 4-year institutions also offer organized occupational programs of less than 4 years duration that result in an associate degree or some other recognition of completion such as a certificate or diploma. Universities are those institutions that place considerable emphasis on graduate instruction and have at least two professional programs that are not exclusively technological.

Universe

The universe for the 1980 enrollment survey consisted of the 3,269 institutions of higher education and their branches listed in the *Education Directory*. The following table indicates the total number of institutional units in the 1980 universe; fall 1979 totals are also included for comparison purposes.

Enrollment category	1980			1979		
	Total	Public	Private	Total	Public	Private
All institutional units	**3,269**	**1,509**	**1,760**	**3,190**	**1,488**	**1,702**
Universities	161	96	65	161	96	65
Other 4-year	1,819	464	1,355	1,814	462	1,352
2-year	1,289	949	340	1,215	930	285

1980 Survey Instrument

NCES Form 2300-2.3 was previously designed for all institutions to report their fall enrollment data, but for the first time in the fall 1980, the enrollment form was split into two surveys: 2300-2.3A for universities and other 4-year institutions and 2300-2.3B for all 2-year institutions. This change was made to ease reporting and to make the enrollment data more comparable and meaningful to data users.

The 1980 enrollment survey requested data by attendance status (full or part time), enrollment level (undergraduate, graduate, etc.), field of study, and sex and racial/ethnic category of student.

Questionnaire Editing

The survey forms, 2300-2.3A and 2300-2.3B, were either mailed to state coordinators or directly to each institution for completion of data. Each response to the 1980 survey was compared with that filed in the previous year. Differences in enrollment patterns were accepted if reasons for them were readily apparent. Addition errors and unusual growth patterns or omissions of enrollment data were marked as possible errors and further information was sought from the institution. Respondents were contacted by letter and/or telephone for verification or revision of the reported figures. These procedures eliminated the larger reporting errors, but the data base will always reflect changes in definitions, reporting procedures, and institutional policies.

The 1980 fall enrollment survey achieved a 99.85-percent institutional response rate. Only five institutions were not accounted for. Four community colleges in New York were included with their main campuses: two branch campuses of Suffolk County Community College and two branch campuses of Erie County Community College. The Center For Degree Studies in Pennsylvania, which is primarily a correspondence school, offers non-credit courses and, as in previous years, has not reported enrollment figures.

For the convenience of the reader as well as for ease in statistical tabulation, totals have not been rounded, but are given as they were reported. In view of the care with which the data were compiled by respondents and reviewed by NCES, it seemed appropriate that the totals reflect actual reporting.

Appendix B - Tables

Table A.—Trends in fall enrollment, by sex, institutional control, and enrollment category: Aggregate United States, fall 1970 through fall 1980

Enrollment category and year	All institutions			Publicly controlled institutions	Privately controlled institutions
	Total	Men	Women		
Total, all students:					
Fall 1980	12,234,644	5,930,655	6,303,989	9,518,086	2,716,558
Fall 1979	11,707,126	5,740,551	5,966,575	9,096,404	2,610,722
Fall 1978	11,391,950	5,697,834	5,694,116	8,843,201	2,548,749

[1]A first-time student is defined as a new freshman (in the fall term) who has never previously been enrolled in an institution of higher education. First-time students are included in the appropriate "total, all students" counts.

Table B-1.—Fall enrollment in higher education, by level of institution and sex and attendance status of student and first-time freshmen, and full-time equivalent (FTE) of part-time enrollments: All institutions, fall 1979 and fall 1980

UNITED STATES DEPARTMENT OF EDUCATION
WASHINGTON, D.C. 20202
HIGHER EDUCATION GENERAL INFORMATION SURVEY HEGIS XV)

FALL ENROLLMENT AND COMPLIANCE REPORT OF INSTITUTIONS OF HIGHER EDUCATION, 1980

PLEASE READ INSTRUCTIONS BEFORE COMPLETING THIS FORM.

FORM APPROVED
PEDAC NO. R 13
APPROVAL EXPIRES 7/82

1. INSTITUTION CODE NUMBER

2. DUE DATE
November 15, 1980

NOTICE: This report is mandatory only for those institutions subject to the requirements of Title VI of the Civil Rights Act of 1964 and Title IX of the Education Amendments of 1972. For the other institutions, it is voluntary and authorized by U.S.C. 1221e-1. See page 2

Supply all the identifying information requested on this page. When the survey form has been completed, return it either directly to the Department of Education, National Center for Education Statistics, 400 Maryland Avenue, SW., Washington, D.C. 20202, or to the HEGIS coordinator, if there is a HEGIS coordinator in your State.

3. NAME AND MAILING ADDRESS OF INSTITUTION OR CAMPUS COVERED BY THIS REPORT *(include city, State, and ZIP code)*

4. NAME AND TITLE OF RESPONDENT

5. TELEPHONE NUMBER OF RESPONDENT *(area code, local number, and extension)*

6. PLEASE NOTE THAT EACH INSTITUTION, BRANCH, CAMPUS OR OTHER ENTITY SEPARATELY CERTIFIED BY THE ACCREDITATION AND INSTITUTIONAL ELIGIBILITY UNIT OF THE U.S. OFFICE OF EDUCATION, WITH IT'S OWN FICE CODE, AND LISTED SEPARATELY IN THE EDUCATION DIRECTORY - HIGHER EDUCATION, SHOULD BE REPORTED ON A SEPARATE SURVEY FORM AND NOT INCLUDED OR COMBINED WITH ANY OTHER SUCH CERTIFIED UNIT. BRANCHES, CAMPUSES, AND OTHER ORGANIZATIONAL ENTITIES NOT SEPARATELY CERTIFIED SHOULD BE INCLUDED WITH THE APPROPRIATE INSTITUTION OR BRANCH REPORT. IF SUCH ARE INCLUDED IN THIS REPORT, PLEASE LIST THEM BELOW.

ARE DATA FOR THIS UNIT INCLUDED IN THIS REPORT?	NAME OF BRANCH AND/OR OTHER CAMPUS	ADDRESS *(city, State, and ZIP code)*
☐ YES ☐ NO		
☐ YES ☐ NO		
☐ YES ☐ NO		

7. IF THE EDUCATIONAL ORGANIZATION OR ENTITY COVERED BY THIS SURVEY REPORT IS PART OF A MULTI-CAMPUS INSTITUTION, OR PART OF A SYSTEM OF INSTITUTIONS, PLEASE ENTER THE NAME OF THE INSTITUTION OR SYSTEM BELOW.
IF NOT APPLICABLE, CHECK HERE → ☐

DEFINITIONS

MULTI-CAMPUS INSTITUTION. An organization bearing a resemblance to an institutional system, but unequivocally designated as a single institution with either of two organizational structures: (1) an institution having two or more campuses responsible to a central administration (which central administration may or may not be located on one of the administratively equal campuses) or (2) an institution having a main campus with one or more branch campuses attached to it.

MAIN CAMPUS. In those institutions comprised of a main campus and one or more branch campuses, the main campus (sometimes called the parent institution) is usually the location of the core, primary, or most comprehensive program. Unless the institution-wide or central administrative office for such institutions is reported to be at a different location, the main campus is also the location of the central administrative office.

BRANCH CAMPUS. A campus of an institution of higher education which is organized on a relatively permanent basis (i.e., has a relatively permanent administration), which offers an organized program or programs of work of at least 2 years (as opposed to courses), and which is located in a community different from that in which its parent institution is located. To be considered in a community different from that of the parent institution, a branch shall be located beyond a reasonable commuting distance from the main campus of the parent institution.

INSTITUTIONAL SYSTEM. A complex of two or more institutions of higher education, each separately organized or independently complete, under the control or supervision of a single administrative body.

INSTRUCTIONS FOR COMPLETING FALL ENROLLMENT AND COMPLIANCE REPORT OF INSTITUTIONS OF HIGHER EDUCATION

GENERAL INSTRUCTIONS

Proofread the completed report before returning it to the National Center for Education Statistics.

This report should include only college-level students taking work creditable toward a bachelor's or higher degree or some other formal recognition below the baccalaureate.

If exact counts are lacking for a particular category of students that should be reported, include an estimate for that group.

Do NOT fill out separate forms for extension centers. Only campuses with their own HCE code numbers should be reported on separate questionnaires. Extension students should be reported on the form for the main campus.

Do NOT include in this report:

(a) Students in noncredit adult education courses and noncredit extension courses.

(b) Students taking courses at home by mail, radio, or television where the course(s) are not creditable toward a bachelor's degree or some other formal recognition below the baccalaureate.

(c) Auditors.

(d) Students studying abroad if their enrollment at the institution is only an administrative record and the fee is only nominal.

(e) Students in any branch campus or extension center in a foreign country.

(f) High school students taking college courses.

(g) Students known to be enrolled concurrently at another college or university, if the latter will report their enrollment *(to avoid double-counting)*. Normally, the institution that will eventually grant the degree should report the student's enrollment.

***NOTE:** No matter what the calendar system, report on this questionnaire only those students enrolled during the FALL TERM.*

If you need CLARIFICATION of any item on the questionnaire that pertains to fall enrollment, call the Survey Director, Dr. Andrew Pepin, NCES, (301) 436-6425.

MAJOR FIELDS OF STUDY AND CORRESPONDING MAJOR FIELD CODES.

The listing below identifies selected categories of major fields of study, and their corresponding codes. These were taken directly from the HEGIS Taxonomy of Instructional Programs in Higher Education and aggregated into the fields listed. The field name and corresponding code number have been preprinted in the upper left-hand corner of each page. If your institution has no students enrolled in any of the designated fields, check the box as indicated. Students enrolled in the fields of Dentistry, Medicine, Veterinary Medicine and Law are not to be reported as undergraduate or graduate students but only as First-Professional students. Students in these programs requiring only 4 or 5 years beyond high school should be reported as undergraduates in the appropriate fields.

0100 – Agriculture and Natural Resources
0200 – Architecture and Environmental Design
0400 – Biological Sciences
0500 – Business and Management
0900 – Engineering
1204 – Dentistry
1206 – Medicine
1218 – Veterinary Medicine
1400 – Law
1900 – Physical Sciences
9000 – All other *(fields not included above and undecided/undeclared)*
9999 – Summary *(total enrollment)*. In addition to separate reports for each of the major fields or sub-fields listed above, complete the Summary report which aggregates the enrollment data on the individual field reports.

Column 15 will be completed ONLY for the Summary report. Individual reports will NOT show data in column 15.

FILING INSTRUCTIONS – COMPLIANCE REQUIREMENTS.

Title VI of the Civil Rights Act of 1964 requires that recipients of Federal financial assistance offer their benefits and services without regard to race, color, or national origin. Title IX of the Education Amendments of 1972 requires that the benefits and services of federally assisted educational programs and activities be offered, with certain exceptions, nondiscriminatorily on the basis of sex. This report is one indicator utilized by the Office for Civil Rights in carrying out its responsibilities to verify compliance with TitleVI and Title IX. Also applicable are Section 799-A, Part H, Title VII and Section 845, Part C, Title VIII of the Public Health Service Act of 1972.

This report is to be filed by all institutions of higher education which receive, are applicants for, or expect to be applicants for Federal financial assistance as defined in the Department of Health, Education, and Welfare Regulation implementing Title VI *(45 CFR 80.13)*, or as defined in any Department of Health, Education, and Welfare Regulation implementing Title IX. If your institution does not fall into any of these categories, please inform us of this fact.

Section 80.6(b) of the Regulation implementing Title VI, set forth below, and similar provisions of the Title VI Regulations of other Federal agencies, authorize collection of this information:

80.6 Compliance information
(b) Compliance reports***

Each recipient shall keep such records and submit to the responsible Department official or his designee timely, complete and accurate compliance reports at such times, and in such form and containing such information, as the responsible Departme. t official or his designee may determine to be necessary to enable him to ascertain whether the recipient has complied or is complying with this part. For example, recipients should have available for the Department racial and ethnic data showing the extent to which members of minority groups are beneficiaries of and participants in federally-assisted programs. In the case of any program under which a primary recipient extends Federal financial assistance to any other recipient, such other recipient shall also submit such compliance reports to the primary recipient as may be necessary to enable the primary recipient to carry out its obligations under this part.

Each institution of higher education, as well as each separately certified branch campus *(with its own HCE code number)* that is subject to the HEW civil rights regulations cited above is required to complete a separate compliance report for certain selected major fields *(listed below)* as indicated in the upper left-hand corner of each page.

RACIAL/ETHNIC CATEGORIES.

The following five racial/ethnic categories are utilized in the survey:

Black Non-Hispanic
American Indian or Alaskan Native
Asian or Pacific Islander
Hispanic
White Non-Hispanic

BEST COPY AVAILABLE

In addition, non-resident aliens, i.e., those members of the aforementioned groups who have not been admitted to the United States for permanent residence, should be separately identified as a sixth category; the non-resident aliens are not separately requested by racial/ethnic group, but only in totals.

The definitions for these categories are:

Non-resident alien. A person who is not a citizen of the United States and who is in this country on a temporary basis and does not have the right to remain indefinitely. Resident aliens, non-citizens who have been lawfully admitted for permanent residence *(and who hold a "green card," Form I-151)*, are to be reported in the appropriate racial/ethnic categories along with United States citizens. Non-resident aliens are to be reported separately, in the columns provided, rather than in any of the five racial/ethnic categories which follow.

Black Non-Hispanic. A person having origins in any of the black racial groups of Africa.

American Indian or Alaskan Native. A person having origins in any of the original peoples of North America, and who maintains cultural identification through tribal affiliation or community recognition.

Asian or Pacific Islander. A person having origins in any of the original peoples of the Far East, Southeast Asia, the Indian subcontinent, or the Pacific Islands. This area includes, for example, China, India, Japan, Korea, the Philippine Islands, and Samoa.

Hispanic. A person of Mexican, Puerto Rican, Cuban, Central or South American or other Spanish culture or origin, regardless of race.

White Non-Hispanic. A person having origins in any of the original peoples of Europe, North Africa, or in the Middle East.

Racial/ethnic designations as used in this survey do not denote scientific definitions of anthropological origins. For the purpose of this report, a student may be included in the group to which he or she appears to belong, identifies with, or is regarded in the community as belonging.

The manner of collecting the racial/ethnic information is left to the discretion of the institution provided that the system which is established results in reasonably accurate data. One acceptable method is a properly controlled system of post-enrollment self-identification by students. If a self-identification method is utilized, a verification procedure to ascertain the completeness and accuracy of student submissions should also be employed where feasible. In order to provide reasonably accurate data, the institution may require students to complete a questionnaire and/or identify themselves by name or otherwise when providing information. The fact that the information is being gathered to comply with Title VI of the Civil Rights Act of 1964 and Title IX of the Education Amendments of 1972 may be disseminated in the manner and to the extent that the administration deems appropriate.

DEFINITIONS

UNDERGRADUATES. Students enrolled in a 4- or 5-year bachelor's degree program, in an associate degree program, or in a vocational or technical program that is normally terminal and results in formal recognition below the baccalaureate.

CLASS LEVEL. Whether first-year, second-year, etc., should be determined in a logical, consistent, and identifiable way. Usually, a student's class level would be based on the proportion of total credits he has obtained toward the completion of the degree program in which he is enrolled, according to the number of years normally required to obtain them.

FIRST-TIME FRESHMEN. Entering freshmen who have not previously attended ANY college. Include students enrolled in the fall term who attended college for the first time in the summer of 1980. Also include students who entered with advanced standing (college credits earned before graduation from high school) at the freshman level.

OTHER FIRST-YEAR. First-year students who entered the institution before the summer of 1980.

UNCLASSIFIED STUDENTS. Not candidates for a degree or other formal award, although taking courses for credit in regular classes with other students.

UNDERGRADUATE LEVEL. Includes but is not limited to undergraduates who cannot be classified by class standing; for example, new transfer students. Also included are students who already have bachelor's degrees or awards below the baccalaureate but are taking courses at the same level or lower. Included also are "special students" and teachers taking additional undergraduate courses for certification.

POSTBACCALAUREATE LEVEL. Includes but is not limited to "special" and other students taking first-professional or graduate courses but who are not working toward a degree.

FIRST-PROFESSIONAL STUDENTS. Students enrolled in a professional school or program which required at least 2 academic years of college work for entrance and a total of at least 6 years for a degree. Report only students in those first-professional degree programs in the field of medicine, law, and theology specified in Part A of NCES Form 2300-2.1, Degrees and Other Formal Awards Conferred. Students in programs requiring only 4 or 5 years beyond high school should be reported as undergraduates.

GRADUATE STUDENTS. Students who hold the bachelor's or first-professional degree, or equivalent, and are working toward a master's or doctor's degree.

FIRST-TIME GRADUATE STUDENTS: A student who is enrolled at the graduate level for the first-time.

ALL OTHER GRADUATE STUDENTS: All graduate students who are not first-time.

FULL-TIME STUDENTS. Those whose academic load-course work or other required activity is at least 75% of the normal full-time load.

FULL-TIME-EQUIVALENT (FTE) ENROLLMENT OF PART-TIME STUDENTS. Convert part-time students *(lines 15-28)* into full-time equivalents by one of the following:

(1) Use a method already employed in your institution to compute FTE's for some other purpose.

(2) Sum the credit hours for part-time students and divide by the normal full-time credit-hour load. (NORMAL FULL-TIME CREDIT-HOUR LOAD) is usually determined by dividing the total number of credits required for completing the program by the number of terms normally required to obtain them. Do not confuse this with the minimum number of credit-hours required for a student to be classified full-time (75% of a normal full-time load). NOTE: Divide by the normal, or average, full-time load, not by the minimum full-time load. For most institutions, this will be 15 credit-hours (not 12).

(3) Assign a fractional value of full-time to each part-time student, appropriate to your institution, such as 1/4, 1/3, or 1/2. Remember that a student taking 3/4 *(75%)* or more of a normal full-time load should be classified as a full-time student.

NOTE: In all cases Full-Time-Equivalent (FTE) enrollment of part-time students should be reported as whole numbers (lines 15-28, column 15).
